LAKSHAY BHATI

Full Stack Developer | AI-Integrated Systems | React.js, Next.js & Node.js

+91 98131 73434 | lakshaybhati1906@gmail.com | Greater Faridabad, Haryana (Open to Relocate)

LinkedIn: linkedin.com/in/lakshay~bhati | GitHub: github.com/lakshay1906

PROFESSIONAL SUMMARY

Full Stack Developer with **3+ years** building and scaling production web applications using **React.js, Next.js, TypeScript, Node.js and Express.js** on AWS, with hands-on experience **integrating AI into production-style systems**: **RAG pipelines, OpenAI embeddings, pgvector similarity search and self-hosted LLM inference**. Comfortable owning features end to end, from database schema and REST API design through Dockerized CI/CD and production support. Shipped a **production e-commerce platform** with **Razorpay** payment integration serving **300+ orders across India**, and a **150+ page enterprise platform**. Proven record in **performance engineering, SEO and debugging**: cut API response time from 20s to 80ms, reduced page load time by 80%, and lowered global content latency by 55%. Experienced with **Redis caching**, **React Testing Library and Jest**, relational and NoSQL databases, and cloud infrastructure, and currently building a **NestJS microservices platform** to deepen backend and distributed-systems engineering.

TECHNICAL SKILLS

AI Integration & Applied AI: OpenAI API & Embeddings, RAG Pipelines, Vector Embeddings, Cosine Similarity Search, pgvector, Ollama (self-hosted LLM inference), Docling OCR Pipelines, AI Coding Assistants (Cursor, Claude Code, OpenAI Codex)

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js App Router, Server-Side Rendering (SSR), React Server Components, Static Generation, Redux, Context API, React Hooks, Component-Based Architecture, Reusable Component Libraries, Single Page Applications (SPA), Responsive Web Design, Cross-Browser Compatibility, Web Accessibility, Core Web Vitals, Tailwind CSS, ShadCN UI

Backend & APIs: Node.js, Express.js, NestJS (in active development), RESTful API Design & Integration, GraphQL, JSON, JWT Authentication & Authorization, OAuth 2.0, Refresh Token Flows, Asynchronous Programming, Input Validation & Secure Coding, Swagger / OpenAPI

Databases & Caching: PostgreSQL, MongoDB, Redis (caching), pgvector, Firebase, Prisma ORM, Mongoose, Drizzle ORM, Schema Design & Optimization, Query Optimization, Indexing, Transactions, SQL Joins, CTEs, Window Functions

Cloud & DevOps: AWS (EC2, Auto Scaling Groups, Spot Fleet, S3, RDS, CloudFront, CloudWatch, SNS, Lambda, SSM Parameter Store, AWS SDK), Docker, Docker Compose, Vercel, Hostinger, CI/CD (CodePipeline, CodeDeploy), Blue-Green Deployments, Cloudflare CDN

Architecture & Distributed Systems (in active development): Microservices Architecture, API Gateway Pattern, Database-per-Service, gRPC & Protobuf, BullMQ, Redis Streams, Event-Driven Architecture, Transactional Outbox Pattern, Idempotency, Retries, Timeouts, Circuit Breakers

Testing & Tooling: React Testing Library (RTL), Jest (Unit & Component Testing), Postman (API Testing), Code Reviews, Debugging & Troubleshooting, Webpack, Vite, NPM, Git / GitHub, JIRA, Command Line (CMD, PowerShell, Bash)

Integrations: Razorpay Payment Gateway, Algolia Search, Typesense, Google Maps API, Firebase OTP, Amazon S3 Uploads

Practices: Agile / Scrum, Application Performance Optimization, SEO (Meta Tags, JSON-LD, Sitemaps), Task Estimation, Cross-Functional Collaboration, Technical Documentation, Structured Logging & Observability, Mentoring Junior Developers

WORK EXPERIENCE

Frontend Developer Executive | Crux Creative Solutions Pvt. Ltd. — Aug 2025 - Present

Full-stack feature delivery and production ownership across an enterprise platform and a live e-commerce product.

Enterprise Web Platform

- Designed and shipped end-to-end features for a **150+ page enterprise platform** built on **React.js and Next.js**, using functional components and React hooks, Redux for application-level state, **Node.js and Express.js** backend services, and MongoDB backing the content management layer.
- Troubleshot and resolved recurring **production incidents** caused by unbounded data fetching, memory consumption spiking from 240MB to 2.2GB under load, by re-architecting REST APIs with **server-side pagination and field-level selection**, reducing response time from **20s to 80ms**.
- Optimized application performance and scalability by architecting a **CloudFront-backed content delivery layer**, reducing global content latency by **55%**, and integrated third-party APIs including **Algolia across 1,000+ assets**.
- Implemented **Dockerized CI/CD pipelines** (AWS CodeCommit, CodeDeploy, CodePipeline), improving deployment velocity by **45%**, and use **AI coding assistants (Cursor, Claude Code, OpenAI Codex)** in daily development while reviewing all generated output before code review.

Production E-commerce Platform

- Developed and maintained a **production-grade e-commerce platform** using **Next.js, React, TypeScript, Tailwind CSS, Redis and REST APIs**, owning customer-facing workflows end to end.
- Implemented complete **product purchasing workflows** and integrated the **Razorpay payment gateway**, contributing to **300+ orders across India**.
- Built **reusable, responsive React components** with a focus on performance and maintainability, and implemented **unit and component testing with React Testing Library (RTL)**, improving frontend reliability and regression coverage.
- Integrated **Redis caching** to optimize frequently accessed application data and backend workflows, and implemented **SEO-friendly pages, metadata, sitemaps, optimized images and responsive layouts** to improve search visibility and performance.

- **Deployed and maintained the production application on Hostinger**, handling environment configuration, production debugging and ongoing enhancements.

Junior Software Developer | Codeapex LLP **Jul 2024 - Jul 2025**

Client-facing product development across three concurrent projects, building both admin and customer-facing web platforms.

- Built a **restaurant-based admin dashboard (a Medusa.js clone)** and the **customer-facing web platform** it served, architecting both around a shared, **reusable React component library** used across three concurrent client products.
- Translated UI/UX designs into responsive, **component-based interfaces**, using Context API for shared state and integrating reusable components with backend **REST APIs**.
- Built front ends across three clients: a React admin dashboard, a customer-facing web platform, and a **real-time mobile app for live route tracking**, all consuming shared backend services.

Flutter Intern | Codeapex LLP **Jan 2024 - Jun 2024**

Cross-platform mobile development for a consumer event-discovery product, from prototype through production release.

- Picked up cross-platform mobile development from scratch and was contributing to core features within the first two weeks, delivering **Surge**, a real-world event discovery application, from prototype through production release.
- Implemented **authentication and authorization flows** using Firebase OTP, **OAuth 2.0** Google Sign-In and JWT token management, and integrated third-party services over **REST APIs**: Typesense search, Google Maps API and S3 media uploads, plus a real-time in-app messaging module.

MERN Stack Intern | Softsynth Software Solutions Pvt. Ltd. **Jul 2023 - Dec 2023**

Full-stack MERN development on a government client project, from requirement gathering through deployment.

- Built and deployed a **Vehicle Disposal Management System** for Traffic Police Faridabad using React, Node.js, Express.js and MongoDB, from requirement gathering to production release.
- Developed and integrated **RESTful APIs** with React functional components and built **responsive, cross-browser interfaces with HTML5 and CSS3** in an Agile team, using Git/GitHub for version control.

PROJECTS

LexRAG | Legal Document Intelligence Platform

Next.js · Python · OpenAI Embeddings · Ollama · pgvector · PostgreSQL · AWS (EC2, ASG, Spot Fleet, S3, RDS, SSM)

- Built an **end-to-end RAG platform** over **30,000+ Indian legal documents**, Supreme Court and High Court judgments, statutory law and the Constitution, collected via a scraping pipeline with automated upload to Amazon S3.
- Ran a **Docling OCR and chunking pipeline** on EC2 with Auto Scaling Groups and Spot Fleet for cost-optimised batch processing, secrets managed via SSM Parameter Store, then generated **1536-dimension OpenAI embeddings** stored in **PostgreSQL on AWS RDS with pgvector**.
- Developed a **Next.js chatbot** converting user queries into embeddings, performing **cosine similarity search** against the vector database, and generating **grounded responses** using a self-hosted **Ollama dolphin-phi 2.7B** model.

Job Application & Interview Tracking System | In Development

NestJS · TypeScript · Next.js · PostgreSQL · Prisma ORM · Redis · BullMQ · Redis Streams · gRPC · Docker Compose

- Developing a **microservices-based platform** with a **Next.js front end** communicating over REST through a **NestJS API Gateway**, and **gRPC with typed Protobuf contracts** for service-to-service communication, with Swagger/OpenAPI at the public boundary.
- Implementing **Redis caching and rate limiting** (cache-aside, TTL, explicit invalidation) and **BullMQ background workers** for notifications and reminders, with retries, backoff and failed-job handling.
- Designing an **event-driven architecture** using **Redis Streams and the Transactional Outbox Pattern** for reliable inter-service event delivery, with a **database-per-service** layout and a dedicated Analytics Service, accessed via **Prisma ORM**.
- Applying SQL optimization (**joins, CTEs, indexes, aggregations, window functions**) and reliability practices: idempotency, timeouts, retries, circuit breakers, structured logging and correlation IDs, with every service containerised via **Docker / Docker Compose**.

myKunba | Blogging Platform

React / Next.js · TypeScript · Node.js · GraphQL · PostgreSQL · Jest · Vercel · Docker · AWS

- Built a responsive **Next.js application** with **JWT-based Role-Based Access Control** across Admin, Author and Reader workflows, a **PostgreSQL** data layer designed with Drizzle ORM behind a **GraphQL** API, and automated **Jest unit tests** covering core application logic.
- Optimized performance, **reducing page load time by 80% (2.6s to 0.5s)** using CDN and edge caching, with zero-downtime releases via **Blue-Green Docker deployments**.
- Improved **SEO** through server-side rendering, React Server Components, meta tag optimization and JSON-LD structured data, and raised the **PageSpeed Insights accessibility score**. Deployed initially on **Vercel**, later migrated to **AWS**.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) | SRM Institute of Science and Technology **Jan 2024 - Dec 2025**

Bachelor of Computer Applications (BCA) | MDU, DAV Centenary College, Faridabad **Sep 2020 - May 2023**

AWS Certified Cloud Practitioner | Amazon Web Services | Core AWS services, security, IAM, and scalable architecture.
